

# Technology Transfer Specialist – Biotech Manufacturing (m/w/d)

## Technology Transfer Specialist – Biotech Manufacturing (m/w/d)

Where Science Meets Innovation Shape the Future of Biologics.

- ✓  **Duration:** 01.08.2026 – 31.07.2027 (Temporary)
- ✓  **Location:** Schachen
- ✓  **Employment Type:** Temporary

### About Our Client

For our client, a leading biopharmaceutical company specializing in cutting-edge biologics drug substance manufacturing for early-phase clinical supply, we are seeking a **Technology Transfer Specialist (m/w/d)**. This state-of-the-art biotech facility operates with a flexible, multi-product strategy integrating the latest technologies into the clinical pipeline to enable rapid, agile product launches and drive innovation in biologics-based medicine development.

### Your Responsibilities

- ✓ Drive the **introduction of new biological products** into manufacturing by coordinating schedules and ensuring tasks are completed on time and right-first-time
- ✓ Prepare and manage **GMP-compliant documentation** such as risk assessments, change controls, batch records, sampling plans, and Bills of Material (BOMs)
- ✓ Maintain and update data across **digital manufacturing systems** including SAP COMET, MES, and DeltaV
- ✓ Develop and support **process descriptions, facility fit analyses, and process models** for continuous and fed-batch manufacturing processes
- ✓ Contribute to the design and rollout of **best practices in tech transfer**, with a focus on streamlining and reducing risk towards fully digitized workflows
- ✓ Author, review, and maintain **SOPs, Work Instructions, Electronic Batch Records (EBRs/gBMRs)** and related manufacturing documents
- ✓ Apply strong **analytical and problem-solving skills** to support cross-functional and global teams in resolving technical challenges

### Your Profile

- ✓ **Degree in a scientific or technical discipline** (e.g. Biology, Chemistry, Biotechnology, Engineering, or related field)

- ✓ **Minimum 5 years of professional experience** in the pharmaceutical or biotech industry, ideally in a GMP-regulated biologics drug substance manufacturing environment
- ✓ Hands-on experience with **digital and automation systems** such as DeltaV, MES, eVal, and SAP COMET
- ✓ Solid understanding of **cGMP regulations** and the principles of New Product Introduction / Technology Transfer
- ✓ Familiarity with **mAb unit operations** and experience with single-use manufacturing systems is a plus
- ✓ Proven ability to **manage small projects** within cross-functional teams, including basic project management skills
- ✓ **Fluent in English** (written and spoken, minimum B1); German language skills are an advantage
- ✓ Collaborative team player with a proactive mindset and a genuine drive for **continuous improvement and learning**

## Why nemensis ag?

- ✓ nemensis AG is your specialized recruitment partner in the Life Sciences sector, headquartered in Basel
- ✓ Comprehensive support and guidance throughout the entire application process by our experienced Consultants
- ✓ Access to an extensive client network and exciting opportunities in Northwestern Switzerland
- ✓ Fast and straightforward placement through individual guidance and personalized career counseling

Ready to take your next step in **Biotech Manufacturing**? At nemensis ag, we've already connected thousands of candidates with their dream jobs giving them the opportunity to grow professionally or re-enter the job market.

**Apply now for the Technology Transfer Specialist (m/w/d) role in Schachen and become part of an innovative biotech environment!**
